## PROJECTS

**EMPLOYEE ATTENDANCE MANAGEMENT SYSTEM BY  
FACE RECOGNITION AND GEO-LOCATION**

Mar 2024 - Mar 2025

- Designed and implemented a comprehensive, real-time Employee Attendance Management System integrating advanced technologies such as Face Recognition, Geo-location services, Geo-fencing, Location Tracking, and Biometric Authentication to enhance workforce management, employee monitoring, and HR operations.
- Developed secure modules for automated payroll generation, live attendance reporting, real-time workforce tracking, and intelligent data analytics to ensure high accuracy, fraud prevention, and streamlined compliance.
- Utilized technologies like Android GPS APIs, and cloud-based database systems to deliver a robust, scalable, and user-friendly solution aligned with modern HR Tech tandards.

**CURRENCY CONVERTER**

June 2024 – July 2024

- The Java projects designed to provide users with a tool to convert amounts from one currency to another using up-to-date exchange rates. The application will offer a graphical user interface (GUI) and/or a command-line interface (CLI) to make it accessible and easy to use.
